PROJECTS

Ballistic Analyzer GitHub <i>Python, OpenCV, Data Structures & Algorithms</i>	Jan 2026
- Engineered a computer vision system for ballistic mark analysis. - Implemented feature extraction and optimized matching pipelines. - Integrated ML models to improve prediction accuracy.	
Customer Purchase Prediction Platform GitHub <i>Python, Flask, Machine Learning</i>	Dec 2025
- Developed platform analyzing 200,000+ records with 92% accuracy. - Built real-time interface reducing decision time by 50%. - Tech Stack: Python, Flask, Machine Learning	

EXPERIENCE

Database & Engagement Designer <i>Reddix – LMS Platform, Jalandhar</i>	Jan 2025 - Present
- Optimized PostgreSQL database for 2,500+ users. - Improved Performance, security, and reliability. - Increased engagement by 60% using data insights.	
Tech and Operations Member <i>Airtribe (Remote)</i>	Mar 2025 – Jul 2025
- Worked on 20+ projects improving delivery speed by 30%. - Built automation systems improving accuracy by 80%.	

CERTIFICATES

Human Computer Interaction NPTEL Link	Oct 2025
Oracle Certified Foundation Associate Oracle Link	Sept 2025
Machine Learning with Data Science CipherSchools Link	July 2025
Deep Learning and Development on Web DevTown Link	Feb 2024

ACHIEVEMENTS

- 1469 rating on Leetcode, 3 stars in Problem Solving on HackerRank, 5 stars in C++ on HackerRank.
- Earned hands-on technical exposure through real-world project implementation and continuous self-learning.
- Solved a significant number of programming and logical problems while preparing for coding interviews and exams.
